MISSION

The Kentucky Heritage Land Conservation Fund (KHLCF) was established by the 1994 Kentucky Legislature and is administered by a 12-member board. The board's mission is to award funding for the purchase and preservation of selected natural areas in the Commonwealth; to protect rare and endangered species and migratory birds; to save threatened areas of natural importance, and to provide natural areas for public use, outdoor recreation and education.

The fund is supported by the state portion of the unmined minerals tax, environmental fines, the \$10 additional fee to purchase a Kentucky nature license plate and interest on the fund's assets.

The board can award grants to acquire and protect areas of natural significance. Grants can be awarded to local governments, state colleges and universities and specified state agencies.

ELIGIBILITY CRITERIA

Applicants for KHLCF grants are required to provide documentation that explains how a proposed acquisition will meet one or more of these priorities:

1. Natural areas that possess unique features such as a habitat for rare and endangered species;
2. Areas important to migratory birds;
3. Areas that perform important natural functions that are subject to alteration or loss; and
4. Areas to be preserved in their natural state for public use, outdoor recreation and education.

Applications must also include: (1) an enumeration of costs, (2) a budget that indicates how at least 10 percent of acquisition costs will be spent for management and (3) a preliminary resource management plan for the project. During fiscal year 2006, the Kentucky Heritage Land Conservation Fund Board held four regularly scheduled quarterly meetings to consider applications for funding.

SUMMARY OF ACTIVITIES

This has been another eventful year for the Kentucky Heritage Land Conservation Fund Board (KHLCFB). The board reviewed numerous applications and approved 16 projects in 15 counties in fiscal year 2006. Since the first awards were made in October 1995, the board has approved 148 projects in 61 counties.

This year, local government projects were approved in Boone, Fleming, Green, Letcher, Metcalfe Powell and Pulaski counties; state agency projects were approved in Barren, Bullitt, Carter, Christian, Hickman, LaRue, Laurel and Monroe counties.

Nearly 1,700 acres of natural areas and wildlife habitat were purchased or protected with Heritage Land funds during fiscal year 2006. Purchases were made on eight projects, including additional acreage at Blanton Forest and another tract along the Green River. A complete list of properties pur-

chased or protected in FY 2006 is at the end of this summary.

More than 25,700 acres involving 94 projects have been purchased since October 1995. Costs of these projects (acquisition, administration and management) total \$28 million. Sizes of projects are as follows:

> 1,000 acres	5 projects
500 - 999 acres	6 projects
100 - 499 acres	46 projects
10 - 99 acres	31 projects
< 10 acres	6 projects

This year, the board held one of its quarterly board meetings in Elizabethtown, which allowed members to visit the nearby LaRue Environmental Education and Research Center

Sales of the nature license plates fell slightly in 2006, possibly due to the change in regular passenger plates and more specialty plate choices. The board is currently seeking public input regarding the designs of the nature plates.

In October 2005, the board celebrated its 10th anniversary. The Kentucky Heritage Land Conservation Fund program has been of great benefit to the citizens of Kentucky. Preservation of Blanton Forest, Letourneau Woods and the Upper Green River Biological Preserve are just three accomplishments of the many people who work diligently to make this program a success. While much has been achieved, the board has great concerns about proposed quality acquisitions that could not be accomplished because of limited funding. We are hopeful that additional funds will become available so that many, many more projects will come to fruition during the next 10 years!

Murphy's Pond, Hickman County

*Chism Addition to Old Mulkey Meeting House,
Monroe County*

Pumphrey Tract, Pulaski County

Total			1,688

APPROVED PROJECTS

(July 1, 2005 to June 30, 2006)

Competitive Grants

BOONE COUNTY FISCAL COURT

Gunpowder Creek, Boone County, 120 acres

Boone County is one of the fastest growing counties in Kentucky and this acquisition will help protect the Gunpowder Creek watershed, while providing outdoor recreation and environmental education opportunities for residents.

FLEMING COUNTY FISCAL COURT

Park Lake Mountain Nature Preserve Expansion, Fleming County, 400 acres

This acquisition would almost double the size of the recently acquired Park Lake Mountain Nature Preserve. This is a wooded area that will be acquired with the goals of increasing public awareness of protected areas, providing additional resting and feeding areas for migrating and wintering waterfowl, and expanding outdoor recreational opportunities for visitors.

GREEN COUNTY FISCAL COURT

Glenview/Green River Nature Preserve, Green County, 175 acres

Acquisition of this tract would help preserve over one mile of river frontage on the Green River, which is one of the eight most important watersheds for aquatic biodiversity in North America, according to The Nature Conservancy and NatureServe in the 1998 publication "Rivers of Live" (Master, et al., 1998). The acquisition will also be an important component in the development of the Green River Paddle Trail.

EASTERN KENTUCKY UNIVERSITY

Halcomb Addition to Lilley Cornett Woods, Letcher County, 125 acres

Acquisition of this property would complement ongoing research and education efforts at Lilley Cornett Woods and provide a much needed buffer to this old growth forest. This would provide benefits to the surrounding natural communities and water quality through the restoration of upland forests and rehabilitation of Pole Creek.

METCALFE COUNTY FISCAL COURT

Dry Fork Gorge, Metcalfe County, 80 acres

This site represents a wooded, largely undisturbed portion of the Little Barren River headwaters. The site has four caves, springs and drainage that represent a critical source water for the South Fork Little Barren River watershed. The caves are possibly an important maternity habitat for bats. Due to the pristine condition of the gorge and caves, it is very possible that habitat exists for rare and endangered plants and invertebrates.

POWELL COUNTY FISCAL COURT

Pilot Knob Expansion 2, Powell County, 185 acres

The purchase of three tracts adjacent to Pilot Knob State Nature Preserve will add significant buffer and increase the amount of unfragmented forest land being permanently protected. These tracts will also provide educational and recreational opportunities for area citizens and visitors to the area.

PULASKI COUNTY FISCAL COURT

Hazeldell Meadow, Pulaski County, 46 acres

The two properties proposed for purchase provide a unique habitat found nowhere else in Kentucky. Known as a “highland rim wet barrens,” the site harbors numerous state endangered and threatened plant species. Sundew and beard-grass are both found at this location, the only known Kentucky site for these two plants. The site offers environmental education opportunities for the residents of Pulaski County, along with outdoor recreation opportunities.

Pumphrey Site, Pulaski County, 27 acres

This site borders Buck Creek, classified by the Kentucky Division of Water as an outstanding resource water due to its diversity of aquatic species. Purchase of this site, which provides habitat to several threatened and endangered species, will help protect Buck Creek and provide hiking trails and environmental education opportunities to area residents.

State Agency Grants

KENTUCKY DEPARTMENT OF FISH AND WILDLIFE RESOURCES

The Kentucky Department of Fish and Wildlife Resources did not request funding in FY06.

DIVISION OF FORESTRY

Robertson Tract, Christian County, 42 acres

The Robertson tract will be managed as an addition to Pennyryle State Forest. This acquisition is a high priority for the Division of Forestry as it could easily be developed for housing or mini-farms. The property has been timbered in the past. The woods are in fairly good condition with young timber.

Aaron Tract, Bullitt County, 430 acres

This acquisition is the second phase of the Knobs State Forest project, which is another Kentucky Heritage Land Conservation Fund project. The tract consists primarily of upland hardwoods. This property, along with the Kuhns property, and close proximity to Bernheim Forest, creates a large, protected contiguous forest, very important to migratory birds. The property will also be used for demonstration areas, interpretive trails, research and outdoor classrooms.

Adkins Acquisition, Carter County, 250 acres

The Adkins property will be managed as an addition to Tygarts State Forest. Approximately 35 percent of the property is pasture, which will be replanted as a hardwood forest. A large cave on the property possibly provides habitat for Indiana bats.

Thompson Creek Glade Addition #2, LaRue County, 20 acres

This would be an addition to Thompson Creek Glade State Nature Preserve, which now covers 155 acres. This addition encompasses two tracts, primarily wooded. Acquisition would provide important buffer and natural habitat around the ecological core of the preserve. Acquisition would also substantially reduce management complications at the nature preserve as prescribed fire is an essential management tool at this particular glade.

Mutter's Cave, Barren County, 110 acres

Mutter's Cave is roughly one mile from the U.S. Army Corps of Engineers' Barren River Lake Project. The acquisition would include the cave entrance, the land overlying the primary cave passage, and important travel corridors to foraging areas for the gray bats inhabiting the cave, considered a high priority gray bat maternity cave by the both the Kentucky Department of Fish and Wildlife Resources and the Kentucky State Nature Preserve Commission.

Murphy's Pond Addition to Obion Creek State Nature Preserve, Hickman County, 175 acres

This project will cover costs associated with the dedication of Murphy's Pond as a state nature preserve. Murphy's Pond will continue to be owned by Murray State University but dedication will provide additional legal protection to one of the most significant natural areas within the state.

DEPARTMENT OF PARKS

Chism Addition to Old Mulkey Meeting House State Historic Site, Monroe County, 19 acres

The primary goals of this purchase are to protect the site's viewshed and to prevent undesirable residential development immediately adjacent to the site. The tract is a high quality woodland with many mature trees and it will provide a buffer zone around the core property.

DIVISION OF WATER – WILD RIVERS PROGRAM

Crockett Tract, Laurel County, 156 acres

This tract is located on the Rockcastle River and its tributary, Hawk Creek. Much of the tract is cliff-bound and inaccessible, though the property could be developed and its timber harvested if not acquired and protected. An abandoned road might be suitable for development of a walking trail but that is the only potentially planned development of the site.

Mutter's Cave, Barren County

Environmental Education

Kentucky Environmental Education Council (KEEC) *(report provided by Jane Wilson Eller)*

Each year, the KEEC receives \$150,000 from environmental fines and penalties. The money is used for environmental education programs in the commonwealth.

Environmental education is often referred to as “tree hugging.” This evokes images of people who approach environmental issues with their hearts but not necessarily with their brains. In fact, there are few endeavors more complex or intellectually challenging than trying to understand the interrelationships between human and natural systems. Added to that challenge is the fact that environmental literacy includes an understanding of how one can take personal and civic action to improve the environment.

Faced with this challenge and supported by those who wrote both the 1999 and 2004 environmental education master plans, the KEEC made an early decision to forgo the usual environmental education activities that include such things as occasional teacher workshops or Earth Day events. Instead the KEEC concentrates on improving the knowledge and skills of all those who provide environmental education to our young people and to our adult citizens. Our goal is to help them provide environmental education that is instructionally sound, delivered equitably, and balanced and factual in content.

As of last year, we had several fledgling programs in place to accomplish this goal. This year, with the exception of the Green and Healthy Schools Program (described later), we have chosen not to initiate new programs but rather to continue to build those in place. This report describes progress on those programs.

•**Certification for nonformal educators and the endorsement for K-12 teachers** - These programs prepare educators in the nonformal sector (e.g. from natural resources agencies, science centers, the zoo) as well as K-12 teachers to more effectively teach about the environment. Both programs are breaking new ground nationally and are based on national standards. The certification program consists of four two-day workshops and one independent study. It requires four major assessments, one of which is a set of 15 short essays that assess the independent study. The endorsement, which is based on the same standards as the certification program, consists of three college courses. (The certification courses can also be taken for college credit). Currently four universities are offering the endorsement; two more are in the process of developing the courses. An endorsement is a specialty area added to a teacher's certificate. For example there are endorsements in gifted education, reading, and now in environmental education.

•**The Kentucky University Partnership for Environmental Education (KUPEE)** - For the past two years, the KEEC has channeled money from the state's Pride fund (created by HB 174) to the eight state universities. With this support, and other monies KUPEE has been granted, the universities become partners in helping to make teachers and other future leaders more environmentally literate.

•**The Green and Healthy Schools Project** - Late this fall, the Kentucky Department of Education and KEEC will launch the Kentucky Green and Healthy Schools Project. This project will provide a structure in which students inventory their own schools to assess their environmental sustainability and their relationship to the health of students and adults who use them. These student-conducted inventories will also help students integrate their learning and apply new knowledge to real world settings.

The inventories, coupled with the improvement projects, which are also part of the program, will help students use the higher-level thinking skills that are the basis of KERA goals. In addition, the program includes opportunities for school districts building new schools to incorporate sustainable and healthy building practices.

•**Commonwealth Water Education Project** - Also, late this fall, a coalition of over 20 agencies and organizations will launch a statewide water education project for adults. The project will include a KET-produced documentary on water issues specific to Kentucky; a series of workshops for local officials; a series of PSAs with a logo and slogan specifically created for the project; a one-stop Web site for water information (including an electronic field trip to a watershed); and a set of teacher workshops organized by watershed. KEEC helped organize the project and will serve as evaluators.

•**A Survey of Environmental Knowledge, Attitudes and Behaviors** - One of KEEC's mandates is to report to the General Assembly on the environmental literacy of Kentuckians. Therefore, we conduct a survey of environmental knowledge, attitudes and behaviors every five years. Our latest survey was conducted in the fall of 2004 by the UK Survey Research Center. A copy can be obtained by contacting the KEEC at (502) 564-5937 or by e-mailing jane.eller@ky.gov.

KEEC has numerous other initiatives as well. The message we want to convey is that we are not conducting environmental education in the usual way. Instead, we are looking critically at exactly what we believe we need to do to improve environmental literacy and strategically designing programs that meet those needs.

Kentucky Division of Fossil Fuels and Utility Services

Each year the first \$400,000 received from the state portion of unmined mineral tax is given to the Kentucky Division of Fossil Fuels and Utility Services (formerly the Kentucky Coal Council) for public education of coal-related issues.

Kentucky Heritage Land Conservation Fund

Board Members

The 12-member board was established by the Kentucky General Assembly in 1994. Five members are appointed from state government agencies - one each from the Department for Natural Resources, the Department of Fish and Wildlife Resources, the Department of Parks, the Kentucky State Nature Preserves Commission and the Environmental Education Council. Seven members of the board are private citizens selected by the governor from nominations by conservation groups, the Kentucky Academy of Science, agricultural interests and natural resources industries. Dr. William H. Martin, Eastern Kentucky University, has been appointed by the governor to serve as chair of the board.

Citizen members receive no pay for attending quarterly board meetings and serving on committees of the board. Committees review applications and visit project sites, review and monitor site stewardship and provide advice and recommendations on issues coming before the board. Board members for the 2005-06 fiscal year were:

Susan Bush
Commissioner, Department for Natural Resources
663 Teton Trail
Frankfort, KY 40601
(502)564-6940
